

Automated Payment Processing for NetSuite

NetCollect

Seamless payment processing, built for NetSuite

**Two-way
Integration**

**Recurring & Single
Payments**

**Automated Fee
Allocations**

Stop wasting hours on manual payment collections.

NetCollect from MacroFin is the smarter way to collect payments in NetSuite—automating recurring collections, handling one-offs, and reconciling everything in real-time.

**Streamline your
payments now**

How NetCollect works...

NetCollect is powered by GoCardless, the world's leading payment collections provider, giving you enterprise-grade reliability without the integration hassle. Even if you already have pre-existing GoCardless accounts, syncing those into one NetSuite account is no problem.

- ✓ Multi-currency integration

Integration Impact

...from payment to posting in a few simple clicks

Accuracy

Eliminate manual error from transaction entry, processing and posting, with intuitive workflows, detailed controls, and clear reporting at every step.

Efficiency

Process 10's to millions of payments with no additional AR requirement, all seamlessly handled within your existing core finance system.

Visibility

Real-time, line-level reporting with up-to-date data, enabling faster insights, broader transparency, and confident decision-making.

Security

Protect sensitive client and payment information by reducing unnecessary touchpoints and strengthening built-in safeguards.

Team

Increase staff satisfaction and retention by removing repetitive, error-prone tasks and empowering focus on higher-value work.
